

3rd GRADE PIP
MARKET MATH MANIA

MEASURE IT UP

Measure It Up

1. Hold the apple, the lemon, the pepper and the cantaloupe

a) Which fruit or vegetable weighs the least? _____

b) Fill in your estimated weight _____ (in pounds)

2. Now let's use the scale to find out which fruit or vegetable is the heaviest. Write the actual weight of each below. Note that some can be fractions of a pound (example $\frac{1}{4}$ pound, $\frac{1}{2}$ pound).

Apple _____ pound 

Cantaloupe _____ pound(s) 

Pepper _____ pound 

Lemon _____ pound 

Bonus

a) Was your estimate high or low? _____ By how much?
_____ pounds

b) Which fruit or vegetable would you get the MOST of in 1 pound?
_____ and how many would you get? _____

3. Next measure the circumference of each fruit or vegetable using a tape measure. Find the thickest part of the fruit or vegetable. Wrap the tape measure around it. Write down the circumference of each fruit below.

The circumference of the apple is _____ inches.

The circumference of the cantaloupe is _____ inches.

The circumference of the pepper is _____ inches.

The circumference of the lemon is _____ inches.
