

Teen AB Drive In Control Class Thank You

In November, Acton Boxborough students had the chance to take a skid control advanced teen driver training and crash prevention class offered by [Drive In Control](#). The experience could not have been more valuable in making our kids better drivers. They experienced first-hand how it feels when a car loses control. They learned how, as drivers, they can prevent that from happening and how to handle the car safely should the situation arise. Each student safely practiced these skills behind the wheel under the guidance of professional drivers on a closed course. It was an experience not only for participating teens but for their parents who observed—a tremendous education for all who attended.

We are most grateful to the Premier sponsors of the class, Acton Toyota of Littleton and Danny's Place, as well as other community supporters including AB PIP STEM, AB Community Education, ABRHS SADD, the Community Alliance for Youth (CAFY) and the Acton Police Association. Through their generosity and our continued program with Drive In Control, AB teens can participate in sponsored classes each fall and spring at a special rate of \$199 (\$149 savings) or at a discount throughout the year.

Please join us in extending a special thank you to generous community Sponsors Acton Toyota of Littleton and Danny's Place for their continued support for this program which creates safer drivers and roads in our communities. We urge all who can take advantage of these classes to do so. For more information or to register, visit www.DriveInControl.com/AB or call 1-888-301-SAFE (7233).

Thanks for sponsoring AB Teen Driving School,
