

Science and Math Kits Available at Library (Beacon, June 2002)

The Acton PIP Coalition (Parent Involvement Project) would like to announce that their math and science kits are currently available for “check-out” at the Acton Memorial Library. These kits are an ideal way for kids and their parents to have hands-on math and science fun, particularly during the summer months. The kits were developed with the support of a Mass. Department of Education grant to promote math, science and technology. Although the kits were developed using grades three and four curriculum, they are easily adaptable for multi-age learning and participation. Some of these kits have been translated into Korean, Portuguese and Russian to support our communities growing diversity.

Come visit your library and “check-out” our Math Games, Tangrams, Calc-U-Doodle, In a Million, Shape and Strength, Explore the Stars and Ice Cream – math and science kits!
